This system enables Doosan Infracore America to aggressively compete in this competitive market. The forklift product line remarkably comprises of 63 distinctive models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these numerous vehicle models range from 3,000 to 33,000 lbs. All vehicles are built in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest expanding lift truck business in the North American market, thanks to their consistency in retaining a high level of consumer service quality and optimum product performance to all Doosan Infracore Forklift users. The U.S. forklift division based in Cleveland has a skilled team experienced in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's initial home-based lift truck market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. begun to import assembled lift trucks as part of a national machinery expansion project. Initial product sales of this industrialized equipment focused on large business communities, the armed services and on state-run corporations. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical instruction became the new focus for enhancing quality and product development.

Daewoo began the first domestic lift truck business in 1967, and rapidly acquired a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's superior technological enhancements combined with sales success placed them in a position of significant growth of their lift truck business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint venture project to counter act competitive pressures in the US materials handling market. This project drastically expanded Daewoo's forklift sales. Construction was finished in 1984 to facilitate a contemporary plant which helped launch the company for the manufacture of high added-value goods suitable for export. In 1993, the corporation had a international sales network and started exporting models they had developed through in-house technology, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into overseas marketplaces.
